## Education

Wrocław University of Science and Technology — MSc in Applied Computer Science July 2026

Wrocław University of Science and Technology — BSc in Algorithmic Computer Science January 2025

## Projects

**Culinary Recipe Manager** | *Java, Spring Boot, RabbitMQ, Angular, PostgreSQL*

- Developed a microservices-based application with a focus on **RESTful APIs** and **system integration** using **Spring Cloud Gateway** and **Spring Security**.
- Implemented **CQRS** pattern to optimize performance and scalability, ensuring clean separation of concerns and maintainable application architecture.
- Designed asynchronous inter-service communication using **RabbitMQ**, following **best practices** for decoupled and reliable distributed systems.
- Built a responsive frontend using **Angular, TypeScript, and HTML5/CSS3**, focusing on user experience and seamless API consumption.
- Ensured system reliability and maintainable logic by applying **best practices** in testing with **JUnit, Mockito, Testcontainers, Jasmine, and Karma** across the full stack.

**Cloud-Native Task Management System** | *Java, Spring Boot, Angular, Terraform, AWS*

- Designed and **configured application environments** using **Terraform (IaC)**, enabling automated deployments and infrastructure scalability.
- Containerized modules with **Docker** and deployed on **AWS Fargate**, managing cloud-native resources for **performance and high availability**.
- Integrated **AWS RDS (PostgreSQL)** and **S3**, utilizing **ORM tools (Hibernate)** for efficient relational database management.
- Implemented secure authentication with **AWS Cognito** and utilized **AWS Lambda** for serverless data processing and system **integration**.
- Established application monitoring and logging via **AWS CloudWatch** to ensure system health and efficiency.

## Experience

**IT Support Technician**, RBO – Wrocław July 2025 – Sept 2025

- Automated workstation setup using **Bash/PowerShell scripting** and managed accounts in a domain environment.
- Collaborated with cross-functional teams to resolve infrastructure issues and gathered requirements for software updates.

## Skills

**Programming Languages:** Java, SQL, TypeScript

**Frameworks:** Spring (Boot), Hibernate, Angular

**Databases & Messaging:** PostgreSQL, MongoDB, Redis, RabbitMQ, Kafka

**Architecture & Web:** REST API, Microservices, GraphQL, Websockets, OpenAPI

**Testing:** JUnit, Mockito, Testcontainers, Postman, Jasmine, Karma

**Tools & Cloud:** Git, Maven, Docker, AWS, Kubernetes, Terraform, Jenkins, Linux/Bash

**Monitoring & Observability:** Prometheus, Grafana

## Publications

- **Privacy-Preserving Real-Time Gesture Recognition Using Cloud-Trained Neural Networks**,
